Kangra, Himachal Pradesh

PROFESSIONAL SUMMARY

Electrical & Electronics Engineer with hands-on experience in Solar PV Operations & Maintenance (O&M). Skilled in preventive and corrective maintenance, string testing, fault analysis, inverter troubleshooting, Earth Resistance Testing (ERT), and performance monitoring. Experienced in managing multiple solar sites, ensuring safety compliance, and improving plant efficiency. A quick learner with strong problem-solving and team coordination skills, seeking opportunities to grow as a Solar O&M Engineer.

EXPERIENCE

Fryble Pvt. Ltd., Mumbai — Solar O&M Engineer

June 2026 – Present

- Managing O&M activities for 15 solar power plants (200–500 kW).
- Performed Preventive Maintenance (PM) and Corrective Maintenance (CM) to improve plant reliability.
- Conducted string testing, fault analysis, and rectification of faulty strings.
- Configured and troubleshot solar inverters, including communication fault rectification.
- Performed Earth Resistance Testing (ERT) and ensured compliance with safety standards.
- Monitored plant performance and implemented actions to improve energy generation.
- Planned and supervised scheduled module cleaning and maintenance activities.
- Coordinated maintenance teams and prepared daily maintenance reports.

Delhivery Ltd, Waidhan (MP) — Team Leader

Jan 2025 – April 2026

- Managed 40+ manpower for daily site operations handling ~3000+ shipments/day.
- Executed shift planning, workload distribution, and daily target achievement.
- Ensured site discipline, safety compliance, and zero operational failures.
- Coordinated between ground staff, supervisors, and management.
- Prepared daily performance & progress reports, similar to DPR format used in EPC projects.

Ecom Express Ltd, Jabalpur (MP)— DC Head

Sep 2024 - Jan 2025

- Led last-mile operations during high-volume periods.
- Managed manpower allocation and escalation closure.
- Improved KPIs and ensured 90%+ service efficiency.

EDUCATION

Ujjain Engineering College ujjain M.P

July 2022 - June 2024

M.E. in Digital Communication

CGPA: 7.67

RGPV Bhopal M.P

July 2018 - June 2022

B.Tech in Electrical and Electronics

CGPA: 8.39

ACADEMIC PROJECTS

- **5kW On-Grid Solar Power Plant Design** -Designed a 5kW solar PV system using PVsyst, including generation analysis, inverter sizing, and plant layout.
- **Smart Pure Sine Wave Inverter Development System**- Developed a 12V DC to 220V AC inverter prototype with MOSFET switching, battery backup, and protection circuits.
- **Rotating Solar Panel Tracking System** - Developed an automatic solar tracking system to improve panel orientation and energy generation.

SKILLS

- Solar PV Operations & Maintenance (O&M), PM & CM
- Site Supervision & Manpower Management
- String Testing, Fault Analysis & Rectification
- Inverter Troubleshooting, Configuration & Communication
- Plant Performance Monitoring & Generation Optimization.
- Earth Resistance Testing (ERT), Electrical Testing
- Site Safety Compliance, Team Coordination & Site Management.
- MS Excel, Maintenance Reporting & Documentation.

ACHIEVEMENTS & CERTIFICATIONS

- **GATE 2021 Qualified**
- 3rd Rank – Srijan State Level EX Model 2020
- CCNA v7: Introduction to Networks by Cisco (July 2021)
- Introduction to IoT by Cisco (June 2021)
- Solar and electrical system Training by Eagle Foundation (2020)
